

Cities & Regions Pavilion

6 – 17 November 2017 • Bonn Zone @ UNFCCC COP23, Bonn, Germany

Tools that enhance operational guidance and decision making for local resilience – The RESIN and SMR tools

Draft as of 01/11/2017

Date: Thursday, 16 November 2017

Time: 13:30 – 15:00

Organized by: ICLEI Europe

Session type: Workshop

Level of access: Open

Session description:

Resilience is a local process, which cities need to drive. This requires skills and methodologies that are often not at hand in city administrations. In order to enhance cities' capacity to resist, absorb and recover from the effects of climate change, two EU-funded projects, RESIN and Smart Mature Resilience are developing standardized tools to support the design of climate adaptation and resilience strategies. The workshop will present the tools developed by these two projects (including tools for assessing risks, selecting adaptation options and evaluating the resilience maturity of a city) and how these contribute to the overall resilience building process.
