In the leadup to COP28, over 20 cities and regions around the world hosted “local stocktakes” as official, local-level contributions to the first Global Stocktake (GST) of the Paris Agreement. Local stocktakes, supported by ICLEI - Local Governments for Sustainability in its capacity as the focal point of the Local Government and Municipal Authority Constituency to the UNFCCC (LGMA), are a direct response to the 2022 UNFCCC Bonn Conference concluding remarks, in which the UNFCCC “encouraged Parties and non-party stakeholders to hold events, at the local, national, regional and international level, as appropriate, in support of the Global Stocktake” (SB56, pgph. 6).

At each local stocktake, government officials and their constituents asked “Where are we?”, “Where do we want to go?” and “How do we get there?” across three themes: (1) local climate ambition, (2) alignment with their country’s Nationally Determined Contribution, and (3) climate justice domestically and globally. Through these discussions, participants identified opportunities for enhanced multilevel action, bringing a critical “on the ground” perspective into the broader Global Stocktake high-level discussion. Lastly, Stocktake4ClimateEmergency advances youth involvement in local climate processes through a collaboration with YOUNGO, the youth and children’s constituency to the UNFCCC.

PARTICIPATING CITIES AND REGIONS

1. Accra, Ghana *
2. Baguio, Philippines *
3. Bonn, Germany – Daring Cities
4. Bristol, UK
5. Broward County, FL, USA
6. Cape Coast, Ghana *
7. Concord, MA, USA
8. Dar es Salaam, Tanzania *
9. Denver, Colorado, USA, Nov
10. Glasgow, UK
11. Hoboken, NJ, USA
12. Kampala, Uganda *
13. Lusaka, Zambia *
14. Makati City, Philippines
15. Mogadishu, Somalia *
16. Nairobi, Kenya *
17. Port Louis, Mauritius *
18. Rosario, Argentina *
19. Saint Paul, MN, USA
20. Seberang Perai, Malaysia
21. Suva, Fiji - Pacific Urban Forum
22. Tangier, Morocco – MEDCOP
23. Turku, Finland
24. Venice, Italy–European Heritage Forum
25. Walvis Bay, Namibia *
26. Yarra, Australia

* Supported by ICLEI
+ Led by YOUNGO

KEY MESSAGES

1. Local stocktakes can accelerate community engagement in the implementation of climate emergency declarations adopted at the municipal councils or regional parliaments. Local stocktakes can be an inspiration for other multilateral agendas (ex: SDGs, biodiversity, food) by accelerating multilevel collaboration and citizen engagement.

2. Local stocktakes can support operationalization of CHAMP initiative and provide a dialogue mechanism for multilevel consultation in NDC preparation and implementation towards COP30 in 2025.

3. The UNFCCC should incorporate local stocktakes in the GST final outcomes, similar to the language in pgph. 6 from 2022 SB56. Cities and regions should continue with local stocktakes annually to continue local connections to the global climate agenda. These annual local stocktakes can also supplement the GST, which occurs every 5 years and may not be quick enough to respond to the rapidly-evolving climate crisis.
**TAKING STOCK OF MULTILEVEL ACTION AND URBANIZATION IN THE CLIMATE EMERGENCY RESPONSE**

HIGHLIGHTS OF ICLEI CONTRIBUTIONS TO PARIS AGREEMENT

✓ In 2016, Darebin, Australia was the first city council to declare a climate emergency. As of 2022, more than 2000 councils adopted this declaration, including more than 500 ICLEI members. Since 2020, ICLEI runs the Daring Cities Forum as the Global Response for Urban Leaders Taking on Climate Emergency.

✓ In 2016, Dunedin was the first city to divest from fossil fuels. As of 2022, hundreds have followed a similar path. In 2022, ICLEI adopted its 100% Renewable Resolution and joined 24/7 Carbon Energy Compact.

✓ In 2015 at COP21, ICLEI launched Transformative Actions Program as the world’s first local climate finance project preparation initiative. As of 2022, more than 30 projects in 23 countries received finance with a volume of 1.32 billion USD.

✓ In 2015, Durban, South Africa pioneered a proposal for an IPCC agenda on cities and climate research. ICLEI also co-led advocacy and implementation of the IPCC decision for the first-ever IPCC co-sponsored conference in 2018 and a Special Report as part of the 7th Assessment Report.

✓ In 2016, ICLEI co-led the creation of an integrated approach for urbanization under the Global Environment Facility and contributed its implementation in GEF6/7/8 cycles.

✓ In 2016, ICLEI pioneered engagement of cities and regions in the Talanoa Dialogues. The Talanoa Dialogues paved the way for 60+ nations to present more ambitious climate plans through multilevel collaboration at COP26 in Glasgow in 2021, with ICLEI concretely engaging in more than 15 countries. The Glasgow Climate Pact introduced an “urgent need for multilevel action” in the Glasgow Climate Pact as a result of these efforts. The Talanoa Dialogues and multilevel NDC collaboration led by ICLEI was then transformed into the Stocktake4ClimateEmergency: local leadership for subnational inputs to Paris Agreement Global Stocktake, which was implemented in 25+ cities in 18 nations in 6 continents.

✓ In 2018, ICLEI pioneered engagement of cities and regions in the Talanoa Dialogues. The Talanoa Dialogues paved the way for 60+ nations to present more ambitious climate plans through multilevel collaboration at COP26 in Glasgow in 2021, with ICLEI concretely engaging in more than 15 countries. The Glasgow Climate Pact introduced an “urgent need for multilevel action” in the Glasgow Climate Pact as a result of these efforts. The Talanoa Dialogues and multilevel NDC collaboration led by ICLEI was then transformed into the Stocktake4ClimateEmergency: local leadership for subnational inputs to Paris Agreement Global Stocktake, which was implemented in 25+ cities in 18 nations in 6 continents.

✓ In 2022, ICLEI facilitated the first ever meeting of Urbanization and Climate Ministers at COP27, which resulted in the first ever urbanization and climate initiative and recognition at the first UN Habitat Assembly, paving the way for ambitious agenda at COP28.

✓ In 2023, ICLEI led and advocated for numerous new multilevel partnerships, from the Amazon Climate Summit to G7, and facilitated local inputs to the Global Stocktake through the aforementioned Stocktake4ClimateEmergency.
